

Compass Child and Family Services **(<https://www.activelink.ie/node/17256>)**

Compass Child and Family Services is a non-for profit organisation set up by a multidisciplinary group of professionals with a long standing involvement in working with children, adolescents and their families from disadvantaged backgrounds.

The **Aim** of our work with families and its individual members is to support and encourage the effective functioning of families.

The **Focus** of our work lies in family-strengthening interventions, both in community based and out of home settings.

Characteristic of our work is the development and implementation of flexible intervention closely orientated on the needs of the individual person(s) considering their specific needs and resources and within their social context.

Our **Philosophy** of working with young people and their families has a strong underpinning and is guided by principles of the continental European Model of Social Pedagogy.
