

[Galtee Clinic \(https://www.activelink.ie/node/48583\)](https://www.activelink.ie/node/48583)

The Galtee Clinic is committed to an evidence based approach to working with children in care. In pursuit of this goal we have a highly qualified and experienced multidisciplinary team that works, in concert, to create a safe and secure setting for young people to live in whilst they participate in the programmes on offer throughout the service.

Hill House and Blossom House are our registered children's homes where we offer a safe, secure and nurturing environment for young people. The young people, in our service, all receive comprehensive, multidisciplinary assessments following which treatment plans are constructed. These plans aim to build upon existing strengths to address difficulties that most often include a combination of problems in attachment, thinking, identity, emotion and behaviour dysregulation. Our ultimate goal is to restore developmental trajectories and give young people the necessary skills and experiences that will assist them in their transition into adulthood and their lives beyond care.
