

Sage Advocacy (<https://www.activelink.ie/node/92555>)

The right to have your voice heard and to participate in making decisions that affect you is a fundamental principle in a democratic society. It is a principle simply stated as "Nothing about you /without you".

Sage is the National Advocacy Service for Older People. It also supports vulnerable adults and healthcare patients in certain situations where no other service is available. It responds according to a person's needs with Information – Support – Advocacy – Safeguarding and often a combination of all these approaches. It also identifies, analyses and highlights issues which require systems changes through Systemic Advocacy.
